Food Tuck

# FARWA KANWAL

Friday 9-12 (Morning)

Day 3 - API Integration Report - [Q-Commerce]

## Project Overview

Project Name: FoodTuck

FoodTuck is an online food ordering platform that allows customers to browse menus, add items to their cart, and place orders seamlessly. The platform integrates APIs for real-time data fetching, secure payments, and order tracking to enhance the user experience.

---

## API Integration Process for FoodTuck Marketplace

Reviewed API Documentation:

- Carefully examined the API documentation to understand available endpoints (e.g., `/foods`, `/chefs`).
- Analyzed the data structure, focusing on key fields (`name`, `price`, `image`) and their data types.

Set Up API Calls:

- Used **Postman** for testing API responses and verifying data accuracy.
  - Implemented **Axios** instead of `fetch` for better error handling and control.
  - Created utility functions within **Next.js** to fetch API data and validate responses via console logs.
- 

## Schema Adjustments for API Data

Food Schema Modifications:

- **Added Fields:**
  - `name`: Stores food item name.
  - `category`: Defines food type (e.g., appetizer, main course).
  - `price`: Holds numeric values for cost calculations.
  - `tags`: Stores food-specific labels (e.g., vegetarian, spicy).
  - `description`: Brief details about the food item.
  - `image`: Reference to the food image asset.

## Chef Schema Modifications:

- **Added Fields:**
    - `name`: Chef's full name.
    - `position`: Job role (e.g., Head Chef, Sous Chef).
    - `experience`: Number of years in the profession.
    - `specialty`: Cuisine expertise (e.g., Italian, Pastry).
    - `description`: Background summary.
    - `image`: Reference to the chef's image asset.
  - **Modifications:**
    - `experience` field updated to numeric type for better representation.
- 

## Migration Steps and Tools Used

### Preparation for Migration:

- Reviewed API data structure and ensured compatibility with **Sanity CMS** schemas.
- Identified relationships between **foods** and **chefs** for accurate data mapping.

### Selected Migration Tools:

- **Axios**: To fetch API data efficiently.
- **Sanity Client**: For creating and managing content within Sanity CMS.
- **Node.js Environment**: Used to write migration scripts and handle API interactions.

### Steps Taken for Data Migration:

1. **Fetching Data from API:**
    - Used **Axios** to make GET requests for `foods` and `chefs`.
    - Logged responses to verify data integrity before processing.
  2. **Uploading Images to Sanity:**
    - Downloaded images using **Axios** as an array buffer.
    - Uploaded assets to **Sanity CMS** and linked them to respective food and chef records.
  3. **Creating and Uploading Documents to Sanity:**
    - Structured API data into **Sanity-compliant** documents.
    - Included references for images, prices, and categories.
    - Uploaded data using `client.create()` method.
  4. **Error Handling and Debugging:**
    - Implemented structured error handling for API failures.
    - Maintained logs for API requests, image uploads, and document creation.
-

## Tools Used for Migration:

- ✓ **Axios** – Fetch API data
  - ✓ **Sanity Client** – CMS integration
  - ✓ **Node.js** – Script execution
- 

## Task Status

- ✓ **API Documentation Reviewed**
- ✓ **Schema Structure Validated & Adjusted**
- ✓ **Data Successfully Migrated**
- ✓ **API Integrated in Next.js**
- ✓ **Final Submission Prepared**

### Description

Spice up your meal with our Spicy Beef Kabab Burger, a perfect blend of flavors and textures. Made with succulent beef kababs, seasoned with aromatic spices, and grilled to perfection, this burger is a treat for meat lovers. Topped with fresh tomato slices and a hint of spicy sauce, every bite offers a burst of bold and zesty flavors. Served in a soft, toasted bun, this burger is ideal for those who crave a little heat in their food. Whether it's a quick snack or a hearty meal, our Spicy Beef Kabab Burger is sure to satisfy your cravings. Pair it with fries or a cold drink for the ultimate dining experience!
